

ABDELKHALEK KADJOUDJ

Backend Developer · Flutter Mobile Developer

+213 796 777 583 | abdelkhalekkadjoudj@gmail.com | Mila, Algeria

PROFESSIONAL SUMMARY

Results-driven Backend Developer and Computer Science student with hands-on experience designing and deploying RESTful APIs, relational and NoSQL databases, and cross-platform Flutter mobile applications. Completed an internship at **Algérie Télécom** and delivered production-grade web solutions for private clients. Adept at working across the full development lifecycle — from system design to deployment — with a strong foundation in Node.js, PostgreSQL, and Dart/Flutter. Seeking opportunities in Algerian tech firms and open to remote freelance engagements.

TECHNICAL SKILLS

Backend	Node.js, Express.js, FastApi, RESTful API Design, JWT Authentication, Middleware
Mobile	Flutter, Dart, GetX, Provider, Dio HTTP Client
Databases	PostgreSQL, MongoDB, SQL (DDL/DML/Joins), Database Schema Design
Frontend	NextJS, Responsive Web Design
Tools	Git, GitHub, VS Code, Postman, VMware/Ubuntu Linux, npm/pip
CS Concepts	OOP (Java), Operating Systems, Computer Networks, Formal Languages

EXPERIENCE

Information Systems Intern · Algérie Télécom — Mila Branch

Summer 2024

- Gained exposure to enterprise-level information systems architecture and network infrastructure within a national telecommunications environment.
- Supported IT staff with internal system operations and documentation, developing practical understanding of IS workflows in a regulated industry.

Freelance Full-Stack Developer · Self-Employed

2024 – Present

Remote · Mila, Algeria

- Designed and deployed a full-stack web platform for a private educational institution ([elite-school-edu.vercel.app](#)) covering student management and course delivery.
- Built a FastApi backend with PostgreSQL persistence, implemented authentication, role-based access control, and data validation layers.
- Developed a responsive frontend using Nextjs/React with mobile-first design principles.
- Managed full deployment pipeline from local development to Vercel production environment maintained version control via Git/GitHub.

Backend Developer (Self-Study Projects) · Personal Portfolio

Sep 2024 – Present

Mila, Algeria

- Built Uni Reporter — a Flutter mobile app enabling students to report campus infrastructure issues, featuring GetX state management, MVVM architecture, and admin dashboard.
- Developed a Subscription Tracker application (Flutter + Node.js + PostgreSQL) including a debugging sprint that resolved a critical Android emulator connectivity issue caused by server binding to localhost vs 0.0.0.0.

- Practiced RESTful API integration using Dio HTTP client and designed PostgreSQL schemas for both projects.

Club Organizer · Unitech Club — Abdelhafid Boussouf University

Sep 2024 – Present

Mila, Algeria

- Coordinated technical events and workshops, managing cross-functional teams to deliver activities on schedule.
- Facilitated knowledge-sharing sessions on software development topics within the student community.

EDUCATION

Bachelor of Science — Computer Science · Abdelhafid Boussouf University Centre

Sep 2023 – Jun 2027

(Expected)

Mila, Algeria

- Relevant coursework: Databases, Operating Systems, Object-Oriented Programming (Java), Web Development, Computer Networks, Theory of Formal Languages & Automata.
- Expected graduation: June 2027.

KEY PROJECTS

Elite School Platform — FastApi · PostgreSQL · NextJs · Vercel

- Production SaaS-style platform for private school management, REST API + responsive frontend, live in production.

Uni Reporter — Flutter · Dart · GetX · Node.js · Express

- Campus issue-reporting mobile app with Flutter frontend, Node.js backend, simplified MVVM architecture, and an admin web dashboard.

Subscription Tracker — Flutter · Node.js · PostgreSQL

- Full-stack subscription management app, resolved complex Android emulator network binding issue (localhost vs 0.0.0.0), improving debugging skills in cross-platform environments.
